PROJECTS

Video News Portal	**AttainU**	**May 2019**

BringTheChange is an online video news portal where users can upload videos anonymously and raise their voice against corruption, crime or any wrongdoings. |Bring The Change |Video Demo| Source Code.

- Designed the front-end of the application facilitating faster video search and upload for the user.
- Implemented user comments feature using **Ajax** which allows users to post and load comments in realtime without reloading the page.
- Developed the backend architecture using **Node.js** and **MongoDB** which resulted in **1.5x faster** page loading time.
- Boosted application video and image loading time by **2x** through the use of **Cloudinary** API's.

Social Media Management Tool	**AttainU**	**Jul 2019**

Post-It is a social media management tool which helps users to manage all their social media accounts at one place. |Source Code.

- To save users time and improve their productivity built several **Auth-Schemes** (Twitter, Facebook, Instagram) which will allow users to connect to multiple social media accounts at one place.
- Implemented **Central Redux Data Store** to control data flow throughout the application efficiently.
- Developed the backend infrastructure of the application by leveraging the rapid prototyping model of the **Parse Server** to save user data to the **MongoDB** database.
- Responsible for integrating third party API's which will help users to manage their social media content.
